

T-FD-23-01 Addendum 1.0

Question Number	Question Detail/Answer Detail	Question Received and Posted Date
1	<p>The departments are looking for proponents to perform adjustments on SCBA seat brackets. As this work should be done by an EVT and most proponents are not licensed to perform these kind of adjustment to brackets that they don't likely sell, can this remove this from the requirement?</p> <p>Answer: To clarify this item Proponents are to advise if their units will fit current fire department apparatus by indicating yes or no to this item in statement C.</p> <p>Currently holders in both Cavan Monaghan and Otonabee-South Monaghan apparatus utilize SCBA holders that accommodate 4500 PSI bottles.</p>	<p>Received: 3/8/2023 10:46:00 AM Posted: 3/9/2023</p>
2	<p>Will the departments allow proponents to have a proper presentation and training when delivering the (6) demo packs? This will ensure that all key features are explained and proper instruction on how to use the equipment before evaluation. It's recommended that proponents have 3 hours to perform training and presentations.</p> <p>Answer: Yes, equal time will be a lot to qualified bidders; a date and time to be scheduled after the tender opening.</p>	
3	<p>The departments are looking for a chest mounted transfil line, which is unavailable. Will the departments accept the NFPA approved location of a transfil line at the cylinder valve instead?</p> <p>Answers: Yes, units must be NFPA compliant to current standards.</p>	
4	<p>Under section 3.0 Itemized Bid, there is 1 column for Pricing, would the departments like proponents to put a per unit price as-well as a extended price for each item?</p> <p>Answer: Unit price is required along with lump sum pricing for each Township.</p>	
5	<p>In Section 2.1 Special Conditions #10, the departments are looking for all SCBA cylinders to be manufacturer within 3 months of delivery. Can the department confirm that the SCBA's are also to be manufactured within 3 months of delivery as well?</p> <p>Answer: The proponent shall make sure all SCBA cylinders are manufactured with a stamping date within 3 months of the delivery date. SCBA units are to meet the current NFPA standard.</p>	
6	<p>In Section 3.0 Itemized Bid, the department is looking for mechanical or electronic voice amp. A basic mechanical speaking diaphragm is standard. But if the department is looking for enhance, clear communications through an electronic voice amp can this be mandatory for pricing? If not, can all proponents at least provide their pricing on electronic voice amp under an Option Pricing category so the departments can determine if this will meet the departments needs?</p> <p>Answer: Any options and or enhancements are to be itemized in section 4.3 section C and any additional costs associated with said items are to be identified.</p>	

Note: This concludes the question period for fire department tender T-FD-23-01. Please include this in your tender package as per section 1.17 of the Tender
