

**Notice of Study Commencement
MacIntosh Bridge
Replacement / Rehabilitation /
Retirement / Repurposing
Municipal Class Environmental Assessment**

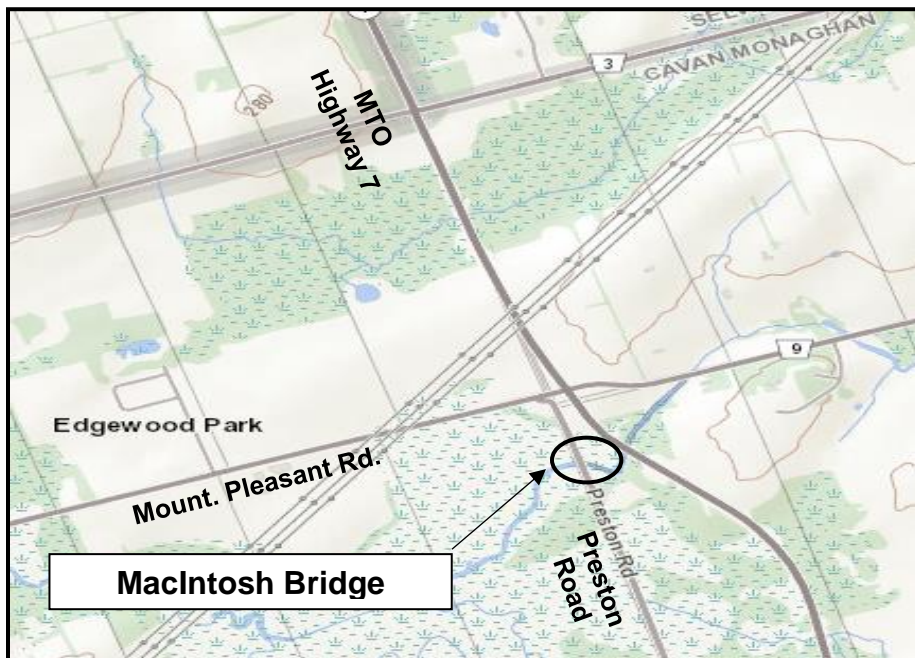

The Corporation of the County of Peterborough (County) is preparing for the replacement, rehabilitation, retirement, or repurposing of the MacIntosh Bridge located on Preston Road. The structure is located approximately 0.35 km south of the intersection with County Road 9 in the Township of Cavan-Monaghan. The MacIntosh Bridge conveys north-south traffic over Jackson Creek.

The County has retained D.M. Wills Associates Limited (Wills) to undertake the Municipal Class Environmental Assessment (Municipal Class EA), structural engineering and design services for the project.

The proposed work is considered to be a Schedule 'B' undertaking in accordance with the Municipal Class EA. Subject to Class EA approval, including comments received as a result of this Notice and future Public Information Centres (PICs), the County intends to proceed with the planning, design and implementation of the preferred alternative solution as recommended in the Project File.

Public and agency consultation is an important component of the Class EA process. Interested members of the public are encouraged to attend the PICs, during which time members of the public can provide written feedback on the proposed alternatives (i.e. replacement, rehabilitation, retirement or repurposing) for the structure. Date and location of the future PICs will be included in a future notice. Feedback received throughout the consultation process will be used in conjunction with the additional findings of the Class EA to determine a preferred alternative, which will be selected for further evaluation and design.

If you are interested in providing comments or receiving further information on this project please contact the following individuals:
