

# Welcome!

**Welcome to the Public Information Centre for the  
Watermain Replacement and Restoration Program for the 2026  
Construction Season  
Cavan Street, Anne Street & Frederick Street**

## Please Sign In

- The purpose of this meeting is to present the draft detailed design for the project.
- Take your time and review the project materials and displays that are presented.
- The Township of Cavan Monaghan and Valdor Engineering staff are available to discuss any questions or concerns you may have.
- The Township is completing this project to replace the existing watermain including water services to the property line and re construction of each street including new asphalt and replacement of damaged sidewalk.

VALDOR ENGINEERING INC.

# Public Information Centre Objectives

The objectives for this Public Information Centre are outlined below:

- Present the engineered design plans for the project.
- Demonstrate how the design has addressed the Key Issues & Opportunities identified by the Township of Cavan-Monaghan for this project.
- Provide construction information so residents understand how the project will unfold.
- Present the proposed schedule for the project.
- Provide a final opportunity for stakeholders to comment prior to construction.

# Key Issues and Solutions

**Key Issues** were identified at the commencement of the project. Below is a summary of those issues and how they are addressed by the proposed design. These elements are shown on the detailed design drawings that follow.

**Issue:** Poor condition of the aging street and watermain distribution piping.

**Solution:** The proposed reconstruction includes replacement of all watermain, sanitary laterals as required, new road granular material, paving and ditching improvements.

# Project Schedule

Below is the project schedule:

- February 2026                      Public Information Centre
- March 2026                         Tendering
- May 2026                            Construction Commences
- November 2026                    Construction Complete

## Construction Info

- The roads being reconstructed will remain open to local traffic during construction with the exception of the creek crossing scope on Cavan Street - lane restrictions will be required to complete installation of underground infrastructure.
- Access will be maintained to all residences during construction. Short interruptions will be required for certain work including sidewalk and connection of the new infrastructure to each home. 48 hours notice will be provided prior to any access interruption.
- A representative of Valdor Engineering will be on site during construction and available to answer any questions or address issues that arise.
- Each home on the streets will be provided with a new internal water meter and external FOB which will be supplied and installed at no cost to the homeowner.
